Wyoming Community College Commission

LEVEL OF INSTRUCTION CODES FOR COURSE

VETTED BY THE ACADEMIC AFFAIRS COUNCIL CURRENT JULY 2015

Outlined in the Wyoming Community College Commission Rules, Chapter One, level of instruction codes are defined as follows:

(ii) "Levels of instruction" means college credit courses that are based on a course's description of class size, required equipment and instructional methods necessary to successfully educate students. The level a course is assigned has been approved by the Commission, committees and councils outlined in the WCCC Policy on Consultation.

Level One: Students are guided by an instructor through course material via classroom lecture, limited field trips, multimedia, text book reading, written assignments, and one-on-one tutorial. Students rely on the instructor to lead the class and assign appropriate homework, as well as tests, based on class lecture.

- (ii) Level Two: Students engage in hands-on techniques in a laboratory setting that are critical for obtaining course knowledge. Students must work somewhat independently while in class to learn and demonstrate skills. Courses are supplemented but not solely based on lecture, textbook reading, field trips, writing assignments and the use of multimedia. This level also incorporates courses that have enrollment limitations.
- (iii) Level Three: Students engage in courses that are highly technical or require significant ancillary equipment. These courses incorporate all methods of instruction with the primary emphasis of instruction centering on equipment: viewing, demonstrations and hands-on experiences. Level three shall also incorporate courses that have enrollment limitations.

Any questions regarding the assignment of level of instruction codes should be directed to the Wyoming Community College Commission's Programs Team Manager. Contact information is available at: www.communitycolleges.wy.edu/staff.aspx.
