Dear GED Applicant,

Congratulations in taking your first step toward earning a Wyoming high school equivalency certificate.

This letter is to inform you that you will be allowed to use a calculator during the first part of the GED mathematics test. However, you may first view a short video (approximately 15 minutes long) prior to taking this test. This video will help guide you through instructions on how to use the calculator that will be provided to you during testing. It is very important that you view this video and have knowledge as to the proper use of the calculator prior to taking the mathematics test. If you have any questions after you have viewed this video, please speak with your GED Examiner or GED Instructor prior to taking the mathematics test.

I wish you luck in completing the current GED Tests and earning your Wyoming high school equivalency certificate.

To ensure that you have viewed the mathematics video, please sign your name below and leave this form with your GED Examiner or GED instructor. A copy will be provided to you upon request.

Sincerely,
Troy Tallabas
GED Administrator
(307) 777-5897

I have viewed the mathematics video and feel confident that I will be able to properly use the calculator while taking the first part of the mathematics test.

Applicant name (Please Print): __________________________________________________
